

DECRO wearable telemetry system for Rat

non-invasive telemetry system for up to 8 rats

Product codes:

Reference: DECRO-START

Product description:

The Bioseb DECRO Solution offers a fully wireless, non-invasive telemetry system specifically designed for real-time monitoring of physiological parameters in rats.

The system enables the measurement of Respiratory function, ECG, and Activity levels in up to 8 rats simultaneously, without surgery or restraint. The DECRO platform is easy to set up, and ensures reliable real time data collection for both short- and long-term studie
