

# Neonate and General Rodent Tattoo Systems

Simple, Humane, Quick & Easy Permanent Animal ID Now available in convenient comprehensive kits for the humane tattoo identification of neonate or adult mice and rats.

**Product codes:**

Reference: ATS-3

**Product description:**

Each kit is provided with a comprehensive training guide and instruction DVD as well as all the tools you need to safely and efficiently tattoo your rodents. AIMs tattooing techniques are performed on unanesthetized animals and produce permanent ID's that are easy to read. AIMs tattoo pigments and supplies have been used in the industry for over 25 years and have been demonstrated to be SAFE and NON-TOXIC. Tattoo identification is cost effective with an average disposable cost of about 2 cents per neonate and 5 cents per adult rodent.

The ATS-3 General Rodent Tattoo System has supplies and accessories to tattoo 3000 weanling rodents and larger. The detailed training guide and instruction DVD provide step-by-step guidance with detailed illustrations. Use numbers, letters, lines, dots, and/or colors to permanently ID any color/strain mouse or rat.
