

LabSand for Urine Collection

Revolutionary hydrophobic sand that keeps the urine on top making sample collection easy!
one batch of 6 boxes

Product codes:

Reference: LABSAND-CS

Product description:

LabSand is revolutionary patented hydrophobic sand used to collect urine samples from animals in laboratory and research settings noninvasively.

This unique product **keeps the urine on top**, making sample collection easy. The all natural hydrophobic coating is nontoxic, sterile, biodegradable, and enables a method which maintains the highest levels of morality and wellness for animals.

LabSand is **laboratory validated and veterinarian approved**, and has gone through extensive research and validation testing, guaranteeing it will not change any parameters of the obtained urine sample.

Noninvasive, stress-free, and easy to use, LabSand is the answer to urinalysis in laboratory and research facilities.
