

Neonatal Mouse Adaptor

To be mounted on a stereotaxic frame -
Delivered with 20° and 45° ear bars

Product codes:

Reference: 68014

Product description:

This adaptor is specifically designed for neonatal mice. It has extended base plate (150x100 mm) and provides more operating space for researchers. It can be easily placed on our stereotaxic instruments.

The incisor, nose clip and ear bars can be adjusted up and down in 20 mm range to ensure the skull level.
