

Neonatal Mouse Anesthesia Adaptor

for stereotaxic frame - use on a mouse within 1 week

Product codes:

Reference: 68072

Product description:

This adaptor is specifically designed for neonatal mice within 1 week. It has extended base plate (150x100 mm) and provides more operating space for researchers. It can be easily placed on our stereotaxic instruments.

Inlet and outlet tubing and one filter are included. This adaptor uses soft tubing to fix animal head to avoid any damage.
