

Rabbit ear simulator

Rabbit ear simulator for IV training of the novice animal handler

Product codes:

Reference: BIO-RABBITEAR

Product description:

BIOSEB follows and offers for many years alternatives to the use of live animals for training in surgical procedures or in an academic and applied work.

Ideal model for learning the skills needed to ethically manipulate the rabbit ear and perform routine practices without the need to use a live animal

Designed with SurgiReal's RealFlow technology, the vessel system included in this simulated rabbit ear is intended to complement teaching

It avoids stress during manipulation, both for the novice experimenter and for the treated animal.

Latex free
