

Ear Puncher

Ear punch with slanted edge, for identification and/or sample collection

Product codes:

Reference: EP-A7020

Product description:

This ear punch is used for identification and/or sample collection.

The angled edge allows cutting rather than puncturing, to minimize animal discomfort.

Requires very gentle pressure to cut the hole.

Length : 11cm

Biopsy sample 2mm

Autoclavable but must be lubricated after use for long and trouble-free use.

Made of stainless steel

Product features:

Diameter: Hole : 2mm
