

Blood bag for Rabbit auricular simulator

An optimal model for developing the skills needed for ethical and humane handling, as well as procedural competencies, without requiring the use of a live animal.

Product codes:

Reference: VTQ-BLOOD-BAG

Product description:

This blood bag offers a realistic representation in both consistency and color, allowing learners to immediately verify results in intravenous injections or blood sampling.

It comes in a practical donor bag equipped with a quick-release fastener and a roller clamp for precise blood flow control.

Additionally, all blood bags include compatible connector pieces for easy attachment to blood collection pads and other simulators.

Fill the bag with fake blood and start using with VTQ-RABBIT-EAR

Capacity : 500ml
