

Spare blood for mouse tail model

Artificial blood for mouse tail kit

Product codes:

Reference: VTQ-MTAIL-BLOOD

Product description:

Our artificial blood offers a lifelike consistency and color, providing immediate feedback during training for intravenous injections and blood collection.

The convenient mixing container allows for flexible dilution to 50-100 ml, depending on the desired concentration.

This enables you to adjust vein visibility and customize the difficulty level of your training as needed.
