

Skin training suture

With the various pre-set wounds, this pad offers the optimal training basis for beginners and advanced beginners.

Product codes:

Reference: VTQ-SUT-PAD-WND

Product description:

With its selection of wounds of different depths, this suture pad offers the optimal training basis for the closure of the subcutis and the exact adaptation of the skin. Cutis, subcutis and muscularis differ from each other in color, allowing training of skin, intracutaneous or subcutaneous sutures.

Our suture pads are reusable, tear-resistant and retain their shape and texture even after repeated use. Our practical pad holder (S) can be used to mount the suture pads in a vertical or a horizontal position, as required.

Product features:

Dimensions: 15 x 16 cm
